Arkhaiya Gangrauli, Kanpur, Uttar Pradesh

Objective

Motivated computer science student actively learning Data Structures & Algorithms and Web Development, with a passion for problem-solving and building practical applications. Seeking an entry-level software development role to apply my skills and grow as a software engineer.

Education

Pranveer Singh Institute of Technology (PSIT)

Bachelor of Technology — Percentage: 70%

Kanpur, UP
2023 – Pursuing

P Mahadev I C Rarua Kanpur Dehat

Class 12th Board Examination (Percentage: 77%)

Kanpur, UP
2021

P Mahadev I C Rarua Kanpur Dehat

Class 10th Board Examination (Percentage: 69.83%)

Kanpur, UP
2019

Skills

- **Programming Languages:** Java, Python, c
- **Web Technologies:** React.js, Node.js, JavaScript, Express.js, HTML, CSS
- **Data Science / ML:** CNN, Image Classification, Matplotlib, NumPy, Pandas, Scikit-Learn
- **Core Computer Science:** Data Structures, Algorithms, Operating Systems, DBMS, Computer Network
- **Software Engineering:** Software Development Life Cycle (SDLC), Agile Methodology
- **Tools & Platforms:** Git, GitHub, RESTful APIs, MongoDB Atlas, MySQL, Vercel, Render

Industrial Experience

FlyRank AI | Backend AI Engineer Intern

Jul 26 – Aug 26

Projects

Mango Leaf Disease Detection System

Feb 26 – Ongoing

- Developing automated diagnostic tool using CNN and YOLOv8 to detect mango leaf diseases
- Applied image preprocessing and data augmentation
- Improved accuracy and robustness of disease detection
- Helps farmers reduce crop loss

PulseDesk — Laravel 11, React 19, MySQL, Docker, OpenClaw, Hermes

Jul 2026

Live Repo

- Built a multi-tenant customer support SaaS platform using Laravel, React, MySQL, and Docker.
- Implemented organization-based data isolation, Laravel Policies, and role-based access control (RBAC).
- Developed RESTful APIs for ticket management, SLA monitoring, audit logs, and analytics dashboards.
- Leveraged AI-assisted development with Hermes and OpenClaw to accelerate feature delivery.

Goal Tracker — React.js, Vite, JavaScript, Tailwind CSS

Oct 25 – Jan 26

Live Repo

- Built a full-stack productivity application with goal tracking, task management, habit streak monitoring, analytics dashboard, and calendar scheduling
- Developed RESTful APIs with 15+ endpoints for goals, tasks, habits, and user operations
- Integrated Chart.js for data visualization and deployed the application using Vercel, Render, and MongoDB Atlas

Certifications

- Introduction to Generative AI — Google Cloud Skills Boost
- Data Analytics Job Simulation — Deloitte
